Entered at the Post Office at Decatur, Illinois as second class mail matter.

SATURDAY EVE., OCT. 13, 1883. As Stephen A. Douglas said the other day, in a speech at Indianapolis, this is not very much of a hurrab campaign, it is a business campaign. It means three meals a day, and a good bed to sleep in.

"This is to be a campaign of brains," was the boastful statement of the Democratic bosses a few months ago. And anybody who has been able to read the Decatur Review for a few weeks past will wonder why Mr. Barnum and Mr. Brice and the other bosses could have made such a reckless promise.

From now until the polls close every Republican should see that he makes every day count. It is not necessary to go out electioneering in order to help our splendid ticket. Try to think of some one whom you can perhaps influence in the right direction and make it your duty to see him.

Mr. Charney Depew has written a letter to the New York Commercial Advertiser denying that the companies in which he is interested are trying to intimidate employes in casting their votes. He says:

Its study or our lines that there shall be absolute friedom of article in portical matters by all officers and employes. They process and should exercise the same rights as ciliters engaged in other occupations. If proof can be given me of any threats or infundation by a superior officer upon a subordinate, he will at once be discharmed from the society. superior officer upon a subordinate, he will at once be discharged from the service.

FOREPAUGH is for Cleveland and Barnum for Harrison. That was a stand-off, until the other day when Lewis Sells, of the Sells Brothers' circus, said to a San Jose, Cal., Mercury reporter: "I am not a politician, but my business brings me in contact with all classes of people in every part of the globe, and I have seen enough to convince me that free trade is the very thing we don't want and should not have in America." It is now two to one on Harrison a good majority.

THE Review parades with a good deal of glee an extract from the Warrensburg Times, predicting a Republican plurality of fifteen on President and a close shave on governor in Illim township. If that is true we fail to see any cause for Democratic rejoicing. The vote of Illini in 1884 was, Blaine 128; Cleveland 127, Oglesby 130; Harrison 128. But that was nearly four years before the advent of the Review editor in Macon county, and he probably knows nothing about it. If he had come around to the REPUBLIcan office we could have given him the figures from our files, or he might have crept in at night and examined them, as has been done by some folks heretofore.

THE Democrats of this county who have stood the brunt of the political bat. | escorted by a number |tle for many years are naturally growing to the residence of very restive under the present party After the meeting to management, which has been usurped by a lot of fellows who have not been until Monday morning here long enough to know the names of the stations at water togs were made were surrounded by newses of people they abuse, the location of eager to eatch a common of the Maina the people they abuse, the location of the most noted public places of the city, or the designation of the streets, and some of them have not been here long some of them have not been here long where he remained and the train moved enough to acquire the right to vote. It is no wonder that so many of them refuse to participate in the work of the party, or that they persist in refusing to stand at the front in anything that is managed, hurran for Harrison and Morton. It have to make is, hurran for Harrison and Morton. or mismanaged, by a lot of fellows whom they look upon as carpet-baggers. Meantime the usurpers, the newcomers, the strangers, go ahead just as though the veterans did not exist. But it is pretly tough on the veterans.

Democrats here are totally duroblounded by the display of change congratulations with you on the Thursday night, and see the utter impossibility of surpassing it, or even equaling it, by anything they might be able to do. Rumor has it that the determination of Rumor has it that the determination of General King, of Banimore, tonowed in the Young Men's Democratic Club last short addresses. night to hold a grand rally here was arrived at in spite of the protests of the cooler heads. Of course the scheme to bent the Republican display is a wild and reckless one, and the Democrate who have been through the mill in years past know it as well as my body else. It is only the modern managers, who know the modern managers, who know the modern managers, who know this offer the modern than a set of t arrived at in spite of the protests of the enough to be heard on the outside.

#### Cleveland as a Workingman's Friend. Pollinapolis Journal.

It is one of the remarkable results of a heated political campaign that men should be found arging workings:en to vote for Grover Cleveland in preference proken voice and tall heschatting manto Benjamin Harrison. In calmer times no candid man would suggest such a preference. Grover Cieveland represents followed and the meeting was protracted to the property show here made three notable to the meeting was protracted to the meeting was protracted to the property of a party that has made three notable hitti a late hit was forty years. How Free Trade Ruined Ireland. Melville E. Stone, who retired from the Chicago News a couple of months ago, is now traveling in Ireland, and writes an occasional brief letter to the Chicago Times. Mr. Stone has been a zeulous ampporter of free trade. In a letter from Clonmel, Ireland, which appeared in the Times recently he says:

the Treesery Department, and else-where, Member- who are going to discass the bill on the starry are making a study of it, and all the information pos-sible is being gathered. As the work progresses the formescaric authorities on the question extress satisfaction at the result, and become more detertown, and one that struck me before I had been here a day. I have never seen so many eilent factories. There are great buildings along the quays, inneres structures on the back streets, buildings great buildings along the quays, interests of the districtures on the back streets, buildings rising six stories in height in the rear of private houses, all vacant. They tell me that previous to the union the linen and woolen factories of Clonnel gave employment to 15,000 to 20,000 people. The entire population of the town now does not amount to over 10,000. It was one of the busiest towns in the three kingdoms; now as far as manufactories are concerned, it is one of the dullest. After the union foreign competition came in and silenced the mills and factories. Whatever it may have done for other countries, or however wise it may be to remove the protective stariff in the United States, Irland stands to-day a terrible example of the workings of free trade.

The Democratical and factories are opened up such a to ling fire on them of the will be notice. For this reason many Democratic method for the first are opposed to an all unament until the experiment of ten first or two weeks the experiment of ten first or two weeks the will be respected. The Democratical as far as manufactories are concerned, it is one of the dullest. Inimical legislation on the part of England drove one after another of the great mill owners out of business, to emigration or poverty. Before the union, Irish industries were protected and fostered by the Irish Parliament. The country was presperous, THE Democratic chairman of Michigan

wrote to the national headquarters: "We day. can work the postoffices to our advantage," This is frank, but not new; for, as everybody knows, the postoffices have | been worked as a political machine since the party of "reform" had control. Judging from indications in this vicinity, however, the Democracy has gone a step further and is working the mails as well as the offices. The Striking Street-Car Men of the West Side Resume Work.

The North Side Men to Receive a Proposition from Mr. Yerkes at Eleven O'Clock To-Day.

All Quiet at the Scenn of Wednesday's Riots, and the End of the Strike Probably at Hand.

CHICAGO, Oct. 13 -- Not a head was cracked nor a care theown from the track yesterday. Cars we can over three of the North Side line and on Madison street on the Wes. Side. The police preparations were over more claborate than those of Wedner bay, and the eathersins in of the crowds and ordered ally damp-ened by the drizzing rain which com-menced falling in the morning and contirued until after dark. Owing to these causes, and perhaps also to a gradually waning interest in the strike, the ranning of cars was attended with searcely any difficulty. Some school children caused a mementary stop-page of the was on Garfield avenue by piling stop counts track, but the youngsters were asiably clased away by the police, and beyond an occasional yell of "scale" trout to sidewalk, the cars proceeded in pence. Persongers, however, were almost as searce as yesterday, and for the roost part the police rode up and down the line in solitary state. Important Statement by the Engineer of the Telescoping Locomotive. Wilkesbarge, Pa., Oct. 13.—Now that the excitement over the great railroad disaster has legue to abate, the work of impartially investigating the causes of impartially have notified in causes of the catastrophe is being carried out in earnest. An important statement was made last night by Engineer Henry Cook, which will be used before the corrects in the property of the catastrophy. oner's jury to day. It was Cook's en gine that crushed into the rear of the section ahead of him. The statement is as follows:

"I left Penn Hayen Junction on engine No. 472 as the helper of origina No. 466, just ten minutes belief the section which preceded us, expectage to make, as did all other engineers on the excursion trains, the time of tade No. 6 between the Junction and Mrs Run, which is twenty-four minutes for the run of about twenty-four in the early and run of about ten miles, which would bring us to Mid Run at \$102, and I know, and the mon in charge of the train in ead of as mast also have known, that the time of No. must be made to chair our to get out of the way of train No. 12, which is due at Penn Haven June for at 7:55, and at Mud Run at 8:12-a run of seventeen minutes. We were running along all right, and I was continually on the about for caps or other signals that might be placed for us. When we round of the curve I shut off when we round of the curve I said of state of state of the stern, as our list unifous were to come into all stations with orgine under full control, and above I my engine to drift along. Tom Mair, the entineer, whose helper I was and who had charge of the signals at Mc1 Err, and as the target showed white, 'W'rlda,' is immediately blow two bloss or up brakes, 'go ahead.'"

UNION DEPOT PLANS.

The Proposed Structure Suggested by the Illinois Central Road for Decatur.

While in Chicago the early part of the week Commissioner Jason Rogers called at the general offices of the Illinois Central railroad company to have something more to say about the new Union depot so badly needed at Decatur. He had the good fortune to meet General Manager Jeffrey, and the encouragement announced some months ago was renewed with assurances that ground would be broken early in the spring, the structure to be built on the Central right of way west of the Central and south of the Wabash tracks, with entrance from the city side of the tracks, so that all possibility of accidents and delay in reaching trains may be avoided. Mr. Rogers was informed by Manager Jeffrey that the plans for Decatur's new Union depot had been drawn, but had not yet been accepted or finally adopted Mr Rogers has just received the plans and they were examined in the REPUBLICAN sanctum today by a number of citizens, including Col D. H. Conklin, of the Terre Haute & Peoria railway D. C. Shockley Rev W. H Prestley, Silas Packard, Γ W

Wrought Steel, NO GAS. Malleable Iron, Very Little Fuel, No Leaky Joints.

No one can say that the time was not ripe for a new furnace. The days of brittle, porous, cast iron furnaces are numbered. In every branch of manufacture east iron is being driven out by wrought iron and steel. Every bridge that goes down in a wreck of lives and property is found to have cast iron members. Every bursting cannon which slays its friends rather than its enemies is made of east iron. Every leaky furnace which poisons a household with its noisome gases is found to be made of the same cheap, unreliable material. Improved methods of manufacture have made steel and iron plate, of first quality, less expensive than cast iron formerly was, and it is plainly in accord with progress in other directions that there should be progress both in design and the material of furnaces for warming our
